Proven protection from the industry leader

## In the yard

## On the road

## At the port

## In the sun

## In the snow

## In the rain

### We focus on you

How does InterWrap® deliver the industry's finest coated woven packaging solutions? Our focus is on your individual needs. Our goal is to listen and learn from you what you require and then deliver it to your specification on time and around the globe.

### Your Challenge

Inadequate packaging leads to rips, tears and contamination from moisture. When this happens, the end result is often expensive and can result in a tarnished reputation for quality control.

### Your Solution

For packaging solid sawn lumber, I-joists & beams, structural panels or other wood products, InterWrap can provide you with the coated woven protection you need to maintain product integrity throughout transportation, inspection and storage. InterWrap also offers custom solutions such as micro-perforated product or adding a slip resistant surface to your wrap such as our patented Safe-T-Grip™. InterWrap's solution includes:

- Multiple domestic and overseas manufacturing locations ensure no disruption in supply
- Global sourcing and manufacturing ensures best value costing and reduces risks to the supply chain
- The industry's only proven automated lumber package wrapping system – The Pro RapidWrapper. An ideal solution for large scale mills looking to streamline production, increase safety and reduce labour costs.
- Domestic warehousing, distribution and manufacturing for fast, reliable and consistent deliveries.
- Fast delivery – Print to ship program and large local inventories increase InterWrap's responsiveness to fluctuating customer demand and changing market conditions
- All fully intergrated manufacturing facilities are ISO certified ensuring consistent quality
- The industry's widest range of custom cover solutions – including multiple grades of materials
- Closed loop recycling program – InterWrap operates its own recycling facility and offers programs to collect and recycle all packaging materials it manufactures.
- Ultraviolet stabilized product
- The assurance that you are dealing direct - not with a distributor - InterWrap manufactures what it sells
- Custom Flexographic printing up to 144" wide, up to 4 spot colors – sharp, bold and vibrant graphics
- Industry leading graphic color control via synchronized inter-branch color matching spectrophotometer equipment.

InterWrap offers a program to collect and recycle used packaging materials!

## Stocked throughout North America

### WeatherPro – Select, Premium and Ultra

#### Key features and benefits:

- WeatherPro products are available in three proven grades of protection; Select, Premium and Ultra
- Protective packaging specifically designed to protect against abrasion, weather, handling and transit damage
- 3 layer design provides excellent tear strength and puncture resistance
- Made from a proprietary blend of 100% recyclable polypropylene
- Available in Widths : up to 152"
- Minimal elongation so that packaging maintains shape
- Reinforced staple strip resists staple pull out
- All WeatherPro grades are designed to operate at an optimum level with the Pro RapidWrapper automated packaging system
- Flexible material for ease of packaging and pliability down to -40°C
- Evenly spaced reinforcing tapes provides flat uniform surface with no gaps between tapes eliminating zebra pattern effects
- White top coat with black or beige undercoat provides superior opacity and reduces internal heat build-up and condensation
- High Titanium Dioxide content in top surface coating provides white surface for sharper graphics
- Unique polyolefin blended top coat surface which promotes strong ink bond for graphics
- Ultraviolet stabilizing additives in all 3 layers: surface coat, the high strength inner fabric, and underside coating
- Mold & mildew resistance

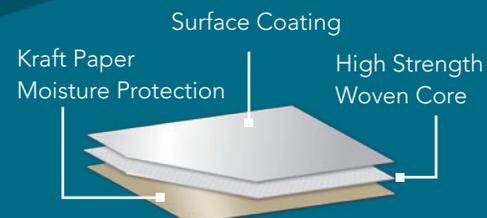

All 3 layers of WeatherPro™ Select, Premium & Ultra are treated with ultraviolet stabilizing additives

### WeatherPro – Elite

- The Elite grade of wrap is a polypropylene reinforced woven wrap made with an underside layer of natural kraft paper to facilitate moisture control within the package
- White exterior surface and brown kraft interior
- Recommended for areas with high humidity or products that are extremely moisture sensitive

WeatherPro™ Elite has a kraft paper underside for added moisture protection

### Available Custom Options

**C-Fold** – Rolls are folded a third on each side to reduce space required for dispensing

**Safe-T-Grip** – Patented slip resistant top surface minimizes load shifting and provides safer conditions for workers. Its coefficient of friction is greater than any other coated woven wood packaging wrap on the market

**Micro-Perforation** – Allows green and treated lumber to breathe and encourages the equalization of humidity inside the package helping to keep your wood clean and mill fresh

All WeatherPro™ prints are color matched to Pantone swatches using the latest digital color matching equipment
