Dear Mr. Di Pede

We started distributing TITANIUM-UDL™ this year after seeing your product at the 2003 NRCA show in New Orleans. We distribute commercial and residential roofing in upstate New York, and have a diverse roofing contractor base that installs shingle, tile, metal, slate residential roofing.

The feedback from our roofing contractor customers to TITANIUM-UDL™ has been excellent! They like TITANIUM-UDL™ because they can eliminate the tarps normally used to cover exposed roofs dried in with asphalt felt. This saves them tremendous time, labor and money involved with handling tarps. It also allows them to be much more flexible and efficient in terms of job scheduling since they don't have to worry any more about the weatherability of the exposed underlayment. They also have commented on the excellent walkability over felt in any type of condition, dry or wet, summer or winter. Because TITANIUM-UDL™ is 10 squares per roll, our customers also save significant time and money because of the faster application speed over felt.

We expect to grow our sales in TITANIUM-UDL™ based on the tremendous response of our roofing customers to your product.

Regards,

Jeff Andrzejak
