

Protect your valuable investments.

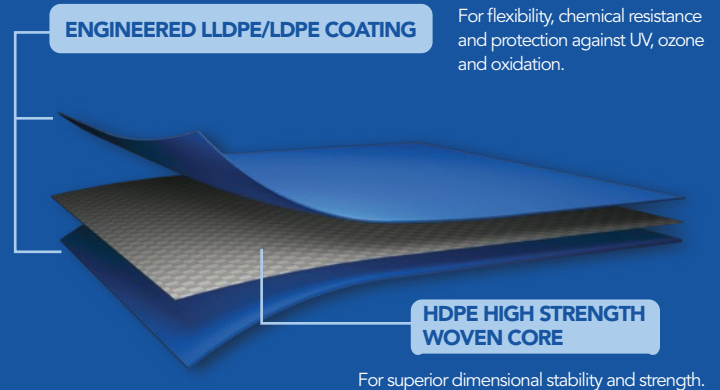

# RhinoWrap™

RhinoWrap™ is a high strength coated woven polyethylene fabric that provides industry leading protection for your valuable investments. RhinoWrap is ideal for both indoor and outdoor applications such as: Truck tarps, agricultural tarps, temporary shelters, poultry curtains and roofs, ground covers, freight covers, machine covers, liners for drums, floor underlays, firewood covers, packaging, bags and much more.

- Coated woven scrim design is Up to 3X stronger than blown film XF products.
- Comparison statistics available – provided by independent Intertek labs using North American ASTM testing standards.
- Superior 2-3 year service life expectancy – competitor blown film XF tarpaulins are only 6 months to a year.
- UV Stabilized fabric – UV additives in all layers – backed by unique industry leading 1 year UV guarantee.
- High quality brand reputation - manufactured by a leading Canadian multinational corporation and global exporter with 29 Years of proven product quality.
- Resilient – Impact and puncture resistant, product holds its shape while still remaining flexible with up to 22% stretch.
- Unaffected by most cleaning chemicals and surfactants, inert to mold or bacteria
- Internal woven core stops tears from propagating.
- 100% waterproof with excellent gas barrier properties.
- Manufactured to IS: 7903:2011 under ISO 8000 product quality and control standards with <10% weight variance.

weaving a better world™
