Mr. Sandro Di Pede
Marketing Manager
TITANIUM-UDL

Dear Mr. Di Pede,

Atlantic Roofing is located in Sheridan, Wyoming and has been in business for over 3 years. We specialize in shingles and flat roof installations. We have used 30# felt exclusively in the past for shingle installations.

About 3 months ago, we started using your TITANIUM-UDL underlayment on shingle jobs, and we now use TITANIUM-UDL exclusively on all our shingle work in replacement of 30# felt.

Some of the great benefits of TITANIUM-UDL:

1. If you leave felt out for even a week, it curls, wrinkles, and if there is some wind, it will blow off. We have to return to repair the felt, re-staple, twine it down, and this costs me time and money. The homeowners also don't like the fact we are having to repair the felt originally installed. Using TITANIUM-UDL, these problems are all gone.
2. The 10 square rolls save us tremendous time and money on installation compared to 30# felt.
3. We are able to walk on TITANIUM-UDL on pitches of 10:12, even with some moisture without any problem. We would not be able to do this safely with 30# felt.
4. The product is much cooler to work with than using black 30# felt. This makes installation that much easier.

We will continue to use TITANIUM-UDL on all our shingle installations.

Sincerely,

Robert Springsteen
Owner
