### **TITANIUM® UDL25 PLUS and UDL30 roofing underlayments receive upgraded warranty period approvals**

**Vancouver, BC Jan 29, 2013** – Starting January 1, 2013 TITANIUM UDL25 PLUS and UDL30 mechanically attached roofing underlayments will now qualify for the following warranty coverage:

UDL25 PLUS will increase from 25 years to **30 years**

UDL30 will increase from 30 years to **40 years**

TITANIUM UDL's historical data on product strength, durability and exceptional product performance has convinced InterWrap's R&D department to approve the new increased warranties as stated above.

TITANIUM products are reliable secondary air, water & vapor barriers should your primary roofing fail or be damaged by severe weather conditions. TITANIUM products provide a homeowner time to get a leaky or storm damaged roof fixed. TITANIUM products are warranted to retain their ability to shed water for the stated warranty period as long as they are installed per the manufacturer's specific application instructions, and neither of the two following conditions occur.

1. No part of the underlayment is exposed to UV after roof cladding installation.
2. The underlayment does not get left uncovered without roof cladding for more than 180 days.
