TITANIUM® Underlayment – now contributes to LEED® points

VANCOUVER, BC Feb 24, 2011 - InterWrap® has recently reached an important milestone for environmental certification of its Titanium UDL line of roofing underlayment products. It now has 3rd party verification and the authorization to use the SCS recycled content logo. This logo confirms that all Titanium UDL products are made with a minimum 20% pre-consumer recycled content. This now means that all TITANIUM UDL products meet LEED MR 4.4 for LEED compliance. In fact InterWrap recycles 99% of all scrap generated from its plants. The company's mission is to further expand its recycling programs and continue to increase the verified level of post-consumer recycled content. This will make things even better for builders or roofers working towards LEED certified projects.

SCIENTIFIC CERTIFICATION SYSTEMS
SCS-MC-02440

Choosing InterWrap's TITANIUM UDL line of roofing underlayment ensures a contribution towards qualifying for LEED points and builders achieving their goals of obtaining a green building designation from the US Green Building Council.
