Interwrap's RhinoRoof U15, "The Original RhinoRoof", has been renamed to RhinoRoof U20.

U20 has the same build, price, and performance as it always has however, after 3 years of deployment we are delighted to offer this improved value

- U20 is now recommended for use under: asphalt and synthetic shingles, metal in residential applications, and shakes.
- The UV exposure rating for U20 has now been increased from 30 to 60 days
- If product is covered within 24 hours it can be anchored with corrosive resistant 3/8"head x 1"
- leg roofing nails and use of every other anchoring mark is acceptable

Going forward RhinoRoof U20 will have the following standards and certifications:

- ASTM D226 Type 1 & II, ASTM 4869, CSA - A123.3
- Class 4 Hail rating – pending
- FBC & Miami-Dade – pending
- ICC / CCR – pending
- Product supports a Class A fire rating – ASTM E108
- Product has now been certified to contribute to LEED® points
- Limited Warranty has been increased from 10 years to 20 years

U20 boasts 67 rolls per pallet (1626lbs), which will change our traditional "truckload" of 32 pallets per to a maximum load of 44,000lbs. The bar code was well will now be 6 94668 50016 5.

Please visit our website for the "truckload configuration tool" at www.interwrap.com/downloads

For more information, please consult our website or your friendly Interwrap Sales Agent. We very much appreciate your business, and look forward to our continued partnership.

Please distribute to all concerned parties in your organization.
